- **UT-501** Vibrating Upholstery Tool
- **CB-180** Mesh Caddy Bag
- **H-431** (2) Hose Hangers
- **CT-3BL** Clip-On Tool Caddy
- **WWH-1** Wall Mounted Wand Holder

## Things to Consider:

A brush using "V-Technology Drive Systems" runs quieter, transfers power, and protects both belt and motor life better than traditional geared belts.

The "DirtSensor" feature monitors the amount of dirt being picked up by the vacuum cleaner. A series of lights lets you know whether the surface still needs cleaning or that there is not enough dirt to warrant further cleaning of the area.

- By getting embedded dirt out of your carpet, you increase carpet life.
- When hanging your hose hanger, place it high enough so you can loop your hose only four times and still clear the floor. It means less work for you each and every time you clean.

## Suited for:

For homes with a variety of carpeted surfaces and numerous other areas to clean, such as above the floor cleaning, shelves, furnishings, and hard floor surfaces, the 3 in 1 kit is perfect. It includes tools for almost every cleaning application.

Transition

# Special Kit Features:

Dirt Sensor...Lets you know when the carpet area is clean.

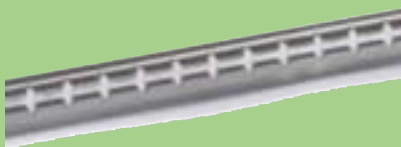

Quiet Drive...V-Technology for continuous contact between brush and belt.

The tear drop design reduces in-hand weight and promotes longer hose life.

Cord management makes above the floor use easy and convenient.

Ratchet adjusts to user's needs.

The Stairclimber Air Turbine's fold-out crevice tool folds out when needed and easily folds in when not needed.

Molded in vinyl for a soft touch to protect fine furnishings.

## • THE POWERHEAD:

The low profile DirtSensor powerhead features a sensor that monitors the amount of dirt being picked up by the vacuum cleaner. A series of lights lets you know when the floor is clean. This brush also provides a full 14" cleaning path and a chevron brush roll for superior cleaning on all carpet conditions. The chevron brush design draws the dirt into the air stream for a deep down clean while grooming the carpet for that "just vacuumed" look. Chevron brush designs run quieter and are great for hand made carpets.

The new Quietdrive V-belt technology uses a multi-grooved reinforced belt for continuous contact and efficient transfer of power to the brush. It's a dramatically quieter system that delivers a positive drive that won't slip or ratchet under severe cleaning conditions.

The easy release of the telescopic wand lets you clean hard floors, baseboards, or above-the-floor surfaces without a second wand or disconnecting the hose. The telescopic wand adjusts to you so there is less strain when cleaning, and the 90 degree rotation lets you get under beds and furnishings.

A four position height adjustment ensures you get the right result on every type of carpeted surface; low pile, berber or even high pile with the softest padding.

## • THE ELECTRIC HOSE:

The hose handle permits you to grip at several points on the handle to match where and how you want to clean. By keeping the hose low to the floor, it keeps the weight out of your hand for easier cleaning.

The quick release cord management feature lets you separate the hose from the wand for your above the floor cleaning needs. No connecting and reconnecting like other products.

A full 360 degree swivel eliminates wrist strain, stops kinking, and increases hose life. Rotate the handle 90 degrees for easy under furniture cleaning.

Available for universal use with a six foot cord or in direct connect version, which eliminates the cord for the most user-friendly cleaning you will ever experience.

## • STAINLESS TELESCOPIC RATCHET WAND:

The stainless telescopic wand can be adjusted to necessary heights to lessen back strain.

With its stainless steel construction, it is more durable than most other wands and reduces chances of rusting, especially in moist climates.

## • STAIRCLIMBER AIR TURBINE:

Stairclimber Air Turbine has a fold-out crevice tool for cleaning cracks, crevices, & risers of stairs.

## • THE ACCESSORIES FOR EVERYDAY CLEANING:

The soft PVC dusting brush won't scratch furnishings and has a full natural fill for gentle cleaning.

The upholstery tool won't seal to the floor or upholstery. Keeping the airflow is necessary for effective cleaning. The directional brush inset helps release imbedded or stuck-on dirt from your stairs or the floor of your car. The vibrating upholstery tool is perfect for loosening embedded dirt and dust in upholstery and mattresses for a deep-down clean.

The fourteen inch floor brush won't push the dirt in front of the tool due to the unique cut of the natural fill. Great edge cleaning and the ideal shape to get in and around furnishings. The Bare Floor & Rug Tool is great for just that--bare floor and rugs.

The pet tool is the perfect attachment for grooming your pet's coat. It gently removes previously shed hair from the pet's coat and whisks it away without the mess.

A full length crevice tool with notched end ensures you keep the air moving when you go down along a car seat or in the corner of stair risers. If you don't move air, you won't move dirt.

A clip-on tool caddy allows you to mount your accessories to your cleaning wand so that they are there when you need them, not back in the closet.

Add a hose hanger for storing the hose, a wall mounted wand holder to store the wand, and a caddy bag to hold all of your tools to and from, and you have a complete home cleaning system to complement your Vacu-Maid central vacuum system.
