

SR-64

The SR-64, a new 14 inch diameter power unit in our Astro Vac line, will feature two powerful, high airwatt 5.7” 2-stage by-pass motors and inverted bag filtration. This large capacity power unit will increase dirt capacity to 38 quarts, allowing you to empty the dirt can less often. The SR-64 will also feature a larger capacity inverted bag, which will provide more useable filtered air space, allowing for a longer period of time between maintenance. This SR-64 power unit also has a special sound reduction chamber, which reduces noise coming from the motor cooling air. The SR-64 is constructed from rolled galvanized steel and powder coated for a tough, corrosion-resistant lifetime of use. As with all of our Astro Vac central vacuum systems, using the SR-64 can help decrease asthma and allergy symptoms by removing dust and allergens from your living areas. Vacuuming with these vacuums provides a powerful, efficient cleaning job that will rid your home of these allergy-triggering irritants.

| SR-64 Single Piece Power Unit | |
|---|--------------|
| MOTOR | (2) 5.7” |
| VOLTAGE | 240 A.C. |
| MAX AMPS | 13.0 |
| MAX AIR WATTS | 1040 |
| AIRFLOW (CFM) | 220 |
| SEALED VACUUM (inches H ₂ O) | 123 |
| FILTRATION | Inverted Bag |
| SOUND LEVEL | 74 db |
| UP TO TOTAL SQ. FEET | 18,000 |
| DIRT CAPACITY | 38 Qt. |

Features & Benefits:

- New 14” Diameter--Larger dirt capacity equals less emptying of the dirt can.
- 38 Quart Capacity--Dirt capacity increase from 27 quart to 38 quart.
- Two 5.7” 2-Stage By-pass Motors--Powerful, High Airwatt Motors
- Sound Reduction Chamber--Reduces the amount of noise coming from the motor cooling air.
- Inverted Bag Filtration--New larger size allows for more time between maintenance.
- Micro-Tex™ Filter--Resists bacteria, mold, and mildew growth. Can also capture particles as small as .3 microns and has a dust retention of 99.6% efficiency.
- Utility Valve Located on Front of Power Unit--Adds convenience by allowing you to plug directly into the power unit.
